## **Sponsorship Opportunity - Lake Effect Robotics**

To whom it may concern,

Would your company like to partner with an exciting activity that promotes science and STEM in the community, builds real-world working skills for youth, competes as a team sport for the mind, and fosters creativity and innovation?

It takes a substantial amount of volunteer and monetary resources to run a FIRST Robotics Competition (FRC) team. We need mentors, in-kind donations, and money to build our robot, register for events, and engage in community outreach. We believe that the resources invested through Lake Effect Robotics to foster STEM projects, will benefit our community and our nation. We hope that our contributions can also benefit your company.

**FRC Team 2708**, Lake Effect Robotics, provides an exciting opportunity to **all students in the Limestone District School Board**. Unfortunately, due to Covid-19 concerns, our team was required to take a hiatus for several seasons. However, we are now coming back together, with our 18 years of FRC experience and incredible histories of success:

- 2019 Imagery Award @ World Championships Detroit Michigan
- 2018 World Championship Winning Team in Detroit Michigan
- 2018 FEDEX Spirit Award @ World Championships Detroit, Michigan

For more details on FIRST Robotics and what a sponsorship with Lake Effect Robotics might entail, we have enclosed an informative Sponsorship Package. Our student team members would love the opportunity to pitch our proposition to you in person. They love sharing their passion and knowledge for robotics, STEM, and FIRST.

Would we be able to talk to you more over the phone or in person? Please do not hesitate to contact us with your availability to learn more about the team and what we do. We thank you in advance for your consideration.

Sincerely yours,

Lake Effect Robotics
